

newton.co.uk

Aim of fund

The objective of the Sub-Fund is to achieve a balance between capital growth and income predominantly from a portfolio of UK and international securities. The Sub-Fund may also invest in derivative instruments, forward transactions and collective investment schemes.

Fund features

This Fund provides the opportunity to gain exposure to a wide range of equity and fixed interest investments both in the UK and internationally. It is one of our longest established funds and, because of its balanced approach, we believe that it is an ideal core holding for a client.

Risks which may affect this investment

- Changes in rates of exchange may affect the value of investments in overseas companies
- May invest in emerging markets. These markets have additional risks due to less developed market practices
- A potential for capital erosion as charges may be taken from the capital of the Fund
- May have a higher risk due to holding bonds which have a low credit rating
- May hold fixed interest securities, which are particularly affected by trends in interest rates and inflation. This may affect the capital value of your investment
- Investments in smaller companies may be less liquid than larger companies and may have more volatile share prices
- May invest in illiquid securities, that may not be readily converted into cash meaning these securities may be subject to greater fluctuation
- Investments in derivatives could have a large impact on the Fund's performance

These factors may affect the performance of the Fund. You should read the Simplified Prospectus in full to understand the features and risks associated with this Fund.
